COCOM Document No. 3711.NI 2/3

COORDINATING COMMITTEE

RECORD OF DISCUSSION

ON

NEW CHEMICAL AND PETROLEUM EQUIPMENT ITEM NO. 2

December 14th, 1959

Present: Belgium (Luxembourg), France, Germany, Italy, Japan,  
Netherlands, United Kingdom, United States.

References: COCOM Documents Nos. 3700.5, 3711.00/1, 3711.NI 2/1 and 2, New  
Item No. 2/W.P.1 and 2.

At the opening of the third round, the UNITED STATES Delegate suggested a slight change in wording which, however, would have the same effect as the definition proposed at the previous discussion by the German Delegation. The amended text would read:

"Ion vacuum pumps (that is, those using the principle of ionization) except those having pumping speeds of less than 800 litres of hydrogen per second at a pressure of  $10^{-6}$  mm./Hg or more (that is,  $10^{-5}$ ,  $10^{-4}$ , etc.); and specially fabricated parts and accessories, n.e.s.."

CONCLUSION: The COMMITTEE agreed that an item defined as shown above would be added to the International Lists.
